

Booking System Sprint Planning Notes

Team: 6.TUES_6:30.6

Sprint: 2

Date: 01/09/2020

Attended:

Scrum Master: Liangyu Nie

Development team: Micheal Kolev, Sami Yildirim, Xiaying Wang

1. Goal

Make progress on the system with a focus on features for the customer side

2. Duration of the sprint

2 weeks

3. What is the team's vision for this sprint?

- Customer appointment booking
- Customer cancel appointment
- Customer edit details
- Customer view booking history

By the end of the sprint the customer side of the project should be largely implemented, with the core functionality of being able to book an appointment completed.

4. Estimation

- View Booking History
 - Medium – Requires communication between front and back end, and new html code for displaying
- Edit Details
 - Small – Should be able to reuse most of the code for registering a customer
- Book an Appointment
 - Large – Core functionality of the project, requires significant communication between front and back end, and significant design for html elements, significant database infrastructure necessary
- Cancel a booking

- Small – Should only require small amount of communication between backend and front end.
