1. Things That Went Well

- Communication – Everyone knew what they were doing
- Mid-Sprint code check-in

2. Things That Could Have Gone Better

- Pushing to git more frequently
- Clearer responsibilities for github tasks

3. Things That Surprised Us

- The variety of react modules available

4. Lessons Learned

- Create a git branch for your user story at the start of the sprint
- Make responsibilities for git tasks clear at stand ups

5. Final Thoughts

- Keep biweekly meetings
- Create git branches earlier

1. Things That Went Well

The division of work

Everyone get the work done

2. Things That Could Have Gone Better

We should take a lot bit work

Push git more regularly

Each feature should have their own branch

3. Things That Surprised Us

Postman is useful

We finished all work even worked in mid-break

4. Lessons Learned

The use of postman

Optimal sprint workload

5. Final Thoughts

Good job for everyone's work
